"Three Star" Readers.

The other day the Sullijel-
man school received a ship-
ment of Free Readers from
the Dept. of Education, pack-
ed in a wooden box, the out-
side of which intimated that
the contents consisted of 12
quarts of Three Star Cognac
Brandy. No, no! we're not in-
timating that anyone here was
disappointed that it contained
only books. What we want to
know is, what the Dept. of
Education is doing with Cog-
nac cases!—The Hay Lake
Times.

This reminds us of an inci-
dent which happened in the
early days of Prohibition in
Alberta, when the thirsty ones
were allowed to send to Sas-
katoon or Vancouver for their
liquid refreshments. In an Al-
berta town a lay preacher was
in the habit of getting a box which
invariably came labelled "Books"
The regularity of the shipment's
and the sameness of the packages
aroused the curiosity of the station
agent; so one day he "accident-
ally" dropped one of these on its
arrival, and was not surprised at
the accompanying sound of glass
breaking. He walked over to the
phone, called up the preacher, in-
quired if he were expecting a box
labelled "Books." On being infor-
med he was, the agent asked him if
he'd come down to the station at
once, that he regretted very much
to inform him that his "books"
were leaking.

LOCAL NEWS.

Mr and Mrs Frankland K
Clarke, Jasper, are visiting
here this week with Mr and
Mrs J F Clarke.

Mr R Goebel, who had been
station agent at Robb for a
short time, has returned to
Stony Plain with his wife, to
reside.

Mr G W Giese went up to
Gnieting this week, with his
engineer, to bring back his
steam outfit, and is now ready
for the Golden Spike thresh-
ing season.

Mr Louie Mayer, who re-
cently underwent an opera-
tion, is making good progress
toward recovery, at an hospi-
tal in the City.

Mr and Mrs E H Fishen-
den, who have been making
an extensive tour of the Brit-
ish Isles this summer, are ex-
pected back in Stony on or
about the 24th.

At the General Hospital,
Edmonton, on Friday, Sept.
16th, to the wife of Mr Ro-
meo Rivest, a son.

The opening of Camrose
Normal School has been pos-
tponed until Monday, Oct. 3.
Several students from this dis-
trict will be in attendance.

Ing's Councilors meet in
Stony Plain tomorrow (Fri-
day) Sept. 23.

Services were held in the
Wudel hall on Sunday last,
Sept. 18, at 7 30 p.m., under
the auspices of the German
Baptist Church. Rev F W
Benke conducted the services
and delivered a very stirring
discourse. The band rendered
some fine musical selections.

Sommerfield & Mayer, on
Monday, unloaded another
car of Chevrolet coaches and
sedans.

Mr Louie Wudel, McCorm-
ick Deering agent in Stony,
received word this week from
a friend in the North country
that 135 complete threshing
outfits were taken in to the
Grand Prairie, Sexsmith and
Chairmont districts. Of these,
75 per cent were McCormick
Deering outfits. Parties about
to buy new outfits, should
choose the best.

Mrs Armand Marsan died
at her home near Duffield on
Monday last, Sept. 19th,
after a lingering illness. De-
ceased was in her 38th year,
and had been a resident of
Spruce Grove district previ-
ous to moving to Duffield.
The funeral took place on
Wednesday, Sept. 21st, to
Spruce Grove cemetery, and
was attended by a large num-
ber of friends and acquaint-
ances of deceased. Rev Chas
Kreman, pastor of St Joseph's
Church, Spruce Grove, offici-
ated.

M M Mecklenburg, the
well-known optical specialist,
will be at the Royal Hotel,
Stony Plain, on Thursday,
October 6th. See him and
see well.

Fight the Fire Fiend

The week commencing October 9 has, by proclamation published in the Official Gazette at Ottawa, been declared Fire Prevention Week throughout Canada. The object is, of course, to focus public attention upon the enormous losses, both of life and property, resulting from fire with a view to the adoption of more effective safeguards against fire, and to educate all people, and especially children, against habits of carelessness in the handling of matches, gasoline and other combustibles, and in the disregard of common-sense methods in the matter of extinguishing camp fires, and such simple matters as throwing away the still lighted stumps of cigars and cigarettes.

At first glance it would seem to be quite unnecessary for the national government to officially set aside one week out of every fifty-two for the avowed purpose of teaching a presumably intelligent, educated and business-like people to safeguard their own lives, homes and property from destruction. Unfortunately, Canada's fire record proves conclusively that it is only too necessary to keep up a persistent campaign to awaken the people from their carelessness and indifference in this very vital matter.

Canada, which is so progressive in many ways, and has taken the leadership in numerous worthwhile movements, and can claim the honor of achievements, occupies a low place among the nations of the world when statistics of fire losses are studied. Few countries, it is indeed, any one, annually record the appalling fire losses which take place in Canada. This Dominion's fire loss per head of population is about the highest in the world, and the passing years do not reveal much improvement.

Canada has already sustained the loss not merely of millions but actually billions of dollars worth of forest wealth, some of which is gone forever, and where long periods of time will be required to make good the loss in other districts. And these forests are one of Canada's greatest assets, — one of the principal factors today, and for the future, in building up the Dominion's greatest industrial enterprises and providing a very large percentage of the Dominion's export trade.

The fire fiend takes a yearly, monthly, almost daily toll of human life, as well as leaving behind it a trail of sorrow, suffering and economic loss in blinded and crippled humanity.

Because of the high ratio of fire losses, the people of Canada have to pay abnormally high rates for fire insurance. The insurance companies are not to blame for demanding high premiums. They must protect themselves and their policy holders, and just so long as fires in Canada remain so numerous and costly, so long will the cost of insurance against fire remain a heavy drain upon the business of the Dominion.

Then, too, there is the further heavy burden imposed upon all urban communities in the maintenance of elaborate and expensive fire-fighting equipment, and large expenditures to augment water supplies for fire-fighting purposes greatly in excess of the daily domestic requirements of cities and towns.

All these forms of protection are necessary, and must be paid for in our tax bills. But because of the frequency of fires largely the result of carelessness and neglect of the most ordinary precautions on the part of many people, these services have to be furnished on a much more extensive and expensive scale than would otherwise be necessary.

Fire Prevention Week should, therefore, be observed all over the country. Special attention should be paid to the subject in all schools, while each individual household should devote a little time to a thorough examination of its premises and make a close check-up of conditions in and around all buildings. Buildings should be cleared away, unprotected stove pipes, electric wires, gasoline and oil supplies attended to, and every member of the family cautioned to exercise the greatest care in handling of matches and all combustible materials, lighted lamps, and in the making and extinguishing of fires. Finally, all property should be adequately insured notwithstanding all precautions that may be taken.

Attention to these important matters now may save much loss and suffering in the future.

maat in Lakewood, N.J. The temperature rose suddenly, causing the helium gas in her containers to expand rapidly, and the wind shifted 180 degrees in a few seconds. The result was that the ship threw her stern high into the air, almost at an angle of ninety degrees, and the tail of the ship dropped down. Meanwhile, however, loose gear in the ship was thrown about, causing some damage.

Japan Needs Post Offices

Government is Considering Plans For Increase in Number

More post offices are needed in Japan. For each 6,700 persons in the country there is only one post office. England and Germany have one to 2,000 persons. The Communications Department is considering plans for the increase in the number of offices and an appropriation is to be included in next year's budget for the opening of 8,000 more post offices over a period extending ten years. At the end of ten years each village throughout Japan will have a post office all its

Canada Favored For League Seat

London Paper Says Dominion Well Qualified For Seat On Council

The London Observer, commenting on Canada's candidacy for a seat on the League Council, says it would be hard to pick another candidate more powerfully qualified for the privilege. The great war was warrant enough of Canada's capacity for international service and she has played other parts since then.

In numbers and influence taken together, continues the Observer, Canada ranks high in the list of candidates, and above all, it would be invaluable for the league to have for the first time a direct representative from North America upon the council.

Toes Kept Free From Sore Corns

When you notice any sign of callous on the feet or toes—that's the time to paint on a few drops of Putnam's Corn Extractor. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes. Putnam's will remove it without pain. In fact on "Putnam's" Corn Extractor "it" does the work—and roots out the corn.

Self-Sustaining Air Services

Probably the only two self-sustaining air transport routes operated during 1926 in the Empire were in Canada—those from Halleybury to the Rouny, and from Sioux Lookout to the Red Lake mining camp. These are on an absolutely commercial basis and have had no Government subsidies.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach, drive out constipation and indigestion; break up colds and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the newborn babe as they are absolutely guaranteed free from opiates or any other injurious drugs.

Concerning the Tablets, Mrs. Alex. J. Perry, Atlantic, N.S., writes:—"I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Coal Not Merely a Fuel

German Scientists Discover Many Valuable By-Products

European scientists appreciate that coal is not merely a fuel but contains raw products to make things out of," declared Dr. Thomas S. Baker, president of Carnegie Institute of Technology, upon his return from a trip abroad.

Coal's potentialities are particularly appreciated in Germany, according to Dr. Baker, where "there has been a most striking development in synthetic fertilizers in connection with coal—the outgrowth of the fixed nitrogen process developed during the war. It is a matter of very great economic force to the country and farm productivity has been materially increased."

"A great deal of the enormous success that the German Chemical Trust is having centres around the chemistry of coal," Dr. Baker said.

"While Germany has lost its monopoly of dyestuffs, it is developing other processes that are of great importance to modern industry. This trust is said to be producing synthetic gasoline on a commercial basis."

It Will Prevent Ulcerated Throat.—At the first symptoms of sore throat, which preveges ulceration and inflammation, take a spoonful of Dr. Thomas' Eclectic Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

French Use Bicycles

Report Shows They Out-Number Automobiles Ten To One

The number of bicycles in use in France in 1925 amounted to 7,112,900, an increase of 5 per cent. over 1925, according to Trade Commissioner Louis Hall, Paris, in a report to the Detroit office of the Department of Commerce.

About half a million bicycles are now used in Greater Paris, the Department of the Seine having 476,665 registered, or two to every eight inhabitants. In the highly industrial departments of Northern France, a total of 856,000 bicycles are in use, or one to every five inhabitants. There are 10 times as many bicycles in France as automobiles.

Asthma is Torture. No one who hasn't gasped for breath in the power of asthma knows what suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Will Plead Law Cases In European Courts

American Woman Attorney Going To Paris, Athens and London

An American woman attorney will try cases in Paris, Athens and London while on a "vacation." She is Miss Grace H. Brown of Detroit, who plans to travel to Europe soon to carry out her legal plans. In Paris Miss Brown will represent an Armenian claiming \$500,000 from the Turkish Government for land he alleges was confiscated. She has been retained in an immigration case in Athens and an involved estate will claim her attention in the London courts. Miss Brown has received introductory letters to the foreign courts from Secretary of State Frank B. Kellogg.

Some men waste a lot of valuable time explaining their actions.

Radio is Better with Battery Power

Ever since the inception of radio, batteries have been the accepted source of power. Pure DC current without hum or surge and correct voltage for all tubes and varying conditions are most conveniently and economically obtained today as in former years with batteries.

A, B & C BATTERIES

made by Eyegrande are the choice of radio users everywhere. There is an Eveready radio battery for every radio need. Your dealer recommends and sells Eveready Radio Batteries. Consult him about the correct batteries for your particular set.

War On Farm Pests Must Be Carried On With The Aid Of Science

Farmers of the future will be largely dependent upon science and the labors of research students, declares Dr. Austin H. Clark, biologist of the Smithsonian Institution, in a statement just issued on the importance of biological research.

Dr. Clark declares that the agricultural war being waged against the pests of the farms is a war in which chemistry and science is playing an important part. In their present-day knowledge of how to meet and fight these foes, he states the husbandmen of the world are 300 years behind the times, and science has only just begun the task of furnishing the organized assistance to which the farmers are entitled.

The full text of the statement follows:

Man lives in a world replete with other forms of life competing with him for his food supply and even striving to consume the very substance of his body. Human existence is a constant struggle with the insects and the other things that consume the grains and other crops, the cattle and the poultry, and with the diseases that consume the flesh.

Our farmers grow the crops and stock by which we live. In doing this they spend their lives in constant costly warfare with the insects. The number of people who could be fed by the wheat or corn or other grain destroyed by insects or clothed by the cotton or wool lost every year represent the casualties on the battle line. We discount these casualties as "losses to the farmer." But take these numbers and read them as "losses to our army" and see what that would mean. The two are really alike in being both losses to our power and all that that implies.

The weapons of the fighting armies always represent the highest attainable perfection of the moment. We know that this is necessary; we also know our fellow men in constant combat the best he can, but his weapons seldom represent perfection, while the hordes which he is called upon to meet are merely "bugs" to him.

Our farmers have no time to spend on the details of entomology, or in the study of the parasites that infest their animals and fowls, any more than our soldiers have time to perfect themselves in the mathematics of range-finding, or in the details of the chemistry of the explosives used in war.

Chemistry and mathematics and that form of social understanding called diplomacy have made the modern armies what they are. Chemistry and mathematics, and a similar understanding of the life history, habits and proclivities of his enemies, insects and parasites, will do the same for modern farmers. Just as the modern army owes its effectiveness to the labors in the past of a relatively small minority of men, largely unconnected with military life, so the farmers in the future more and more will be dependent on the labors of the research students.

In their knowledge of their foes and how to meet them, our farmers are 300 years behind our soldiers; and if we compare the potential casualties represented by insect depredations, by loss through parasites, or by imperfections in our knowledge of plant and animal breeding and in similar ways with the casualties in the armies of the world the difference is still greater. We have only just begun the task of giving to our farmers that organized assistance to which they are entitled.

How about our fishermen and those who live along the coasts? In the not distant future when the cultivation of the land has reached its limit and no further increase in our crops is possible we shall have to cultivate the seas as well, and from it take the food to feed our surplus population.

He—I'm poor, but poverty is no disgrace.

She—"No, but that's about the only thing that can be said in its favor."

The favorite cat of Shunbana of Sarakara, a wealthy Japanese prince, died recently and was accorded a costly funeral with 24 pall-bearers.

Safeguards the Consumer

All Eggs In Denmark Are Stamped, Catalogued, and Indexed

An egg in Denmark is no ordinary egg. The Danish egg has its own peculiar life history. Usually an egg ends its ordinary career upon being hatched, but not so a Danish egg. Every egg in Denmark upon birth is catalogued and indexed, so that any consumer eventually having trouble with that egg may gaily redress. On the egg is rubberstamped a number, with various digits, showing the date it was laid, its hatchery, owner and hen. The excellent agricultural system of Denmark makes this possible, and the numbering of the eggs is not only a check on the efficiency of various dairies, but a safeguard to the consumer.

Faculty Of Fisheries

The First Of Its Kind That Has Been Established In Canada

A special despatch to the Montreal Star indicates that for the first time in the history of universities on this continent a "faculty of fisheries" is to be established in a Canadian institution. Dalhousie University, Halifax, is selected for the innovation, which results from negotiations between the marine and fisheries department, the biological boards of Canada, and the university authorities. Dalhousie will give a course in the fundamental sciences while the biological board will treat of fishery subjects. A government appropriation of \$25,000 has been made towards the establishment of a marine laboratory, the Star says.

Winnipeg Newspaper Union

A Smartly Simple Frock

Extremely graceful is this attractive frock and a style the home modiste will find quite simple to fashion. The flared skirt is joined to the bodice having gathers at each shoulder, a vestee, and straight collar. The long sleeves may be loose, or gathered to narrow wrist-bands, and a soft bow is placed at the front. No. 1640 bust. Size 38 requires 3 1/2 yards 35 in. in sizes 36, 38, 40, 42 and 44 inches 4 or 5 yards 54-inch material, and 1/2 yard 39-inch contrasting for vestee. Price 25 cents the pattern.

Many styles of smart appeal may be found in our new Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

Increase Yield Of Wool

Wool Producing Capacity Of Sheep Improved By Transplanting Glands

Dr. Serge Voronoff, noted gland specialist, started the tenth international zoologists' congress at Hungary by the announcement that the wool producing capacity of sheep can be vastly increased by the transplantation of glands. The method with which he experimented for three years on an Algerian farm resulted in a 25 per cent. increase in the yield of wool, he declared. He transplanted the glands of mature, ram in six months, lambs. The lambs thus treated were, on reaching the age of two years, an average 16 pounds heavier than ordinary sheep, and each time they were shorn they yielded 25 ounces more wool than those in which nature had been allowed to take its course.

Dr. Voronoff said he also found that the offspring of the rejuvenated lambs had their sties characterized as to 20 per cent. greater weight and 25 per cent. larger wool yield. Inasmuch as each ram in the course of a year impregnates 50 sheep, 100 rejuvenated rams sufficed to raise a superior flock of sheep annually.

An Ideal Wheat

Double Chaff Grain Would Withstand Cold Says Motherwell

Wheat with double chaff, to protect it against early frosts in Western Canada, is urged by Hon. W. H. Motherwell, Minister of Agriculture, who spoke on Saskatchewan Day at the Canadian National Exhibition. The breeding of wheat with a double chaff, he thinks is quite within the margin of possibility.

"For a cold might put you on an overcoat," he asserts, "I see no reason why we should not put an overcoat on our wheat to protect it against early frost."

Farmer's Advocate—Canada has never spent too much money on research and experimentation. It was the fruits of experimental work that opened up millions of land to settlers and made Canada the granary of the Empire.

Stamp collecting is the hobby of several royalties, including the King of England, the Princes of Wales, King Alfonso of Spain, the Queen of Italy, and the crown princes of Italy and Sweden.

Canadian Seeds Grow Better In All Parts of the World Than Seeds From Other Countries

Cauliflower King Of America

Klaus de Jong, Of Kildonan, Manitoba, Again Carries Off Premier Honors

At the American Vegetable Growers' Association annual show, recently held at Syracuse, N.Y., Klaus de Jong, a market gardener of East Kildonan, Manitoba, six miles north of Winnipeg, won for the second time the title of Cauliflower King of North America. Last year he won the crown at the A.V.G.A. Show at Cleveland, Ohio.

In competition with entries from several states Mr. de Jong carried off the championship prize for the six head of cauliflower that he exhibited, because of their superiority in size, weight, uniformity of shape and general appearance. Each of the half dozen cauliflower was acknowledged by the judges to be among the finest specimens they ever had seen. In addition to winning the money prize given by the American Vegetable Growers' Association Mr. de Jong was awarded a silver cup donated by Alexander Forbes of Newark, New Jersey.

Klaus de Jong is one of the most successful market gardeners in Western Canada. Twenty-one years ago he came from Holland and purchased for a nominal price the 10 acres he now cultivates and from which he makes a good living. Although Mr. de Jong won such notable distinction for cauliflowers, he grows a wide variety of other vegetables of equally high quality, for owing to the long sunny days in Western Canada vegetables and flowers common to the temperate zone, thrive particularly well.

Russia's Wettest Spot

The Uman locality (of the Voronez) Province, with a population of some 16,000 people, appears to be the "wettest" spot in the Soviet Union. It is reported that during the last year it has consumed 105,000 gallons of state-produced vodka, representing a sum of \$440,000—equalling the yearly budget of the locality—not counting a similar amount of moonshine, alcohol, beer and liquors consumed.

Because Canadian seeds seem to grow better in all parts of the world than seeds from any other country the Dominion is getting control of the tree seeds business of the world. The Antipodes, particularly Australia and New Zealand, take most of the seed exported from Canada but Italy will be the largest seed consumer this year, Capt. Wm. A. Edye-de-Hurst, of Dennyhurst, Ont., president of the seed exporting business at that point, is responsible for this. Information he divulged while passing through Winnipeg recently on his way to Kamloops, B.C., where he has a seed separating plant.

The captain stated that the Italian government has instituted a large reforestation scheme, and has ordered supplies for the project from Canada. Denmark also, the captain said, imports Canadian seeds for her reforestation work which has been carried on for several years.

Even Russia has asked for Canadian seeds, but the Captain said that he didn't think that country would get any seeds from the Dominion as a deposit in negotiable securities was asked for by the Canadian company, but the guarantee was not forthcoming, although the request has been made for several years now.

Increased Immigration

Gain Over 38 Per Cent. Over Previous Year

Immigration to Canada for the first seven months of this year totalled 119,678, as compared with 86,480 for the corresponding period of 1925. This is an increase of 38.3 per cent., according to railway officials.

However, the fruit of the embargo imposed by Hon. Charles Stewart, while acting as minister of immigration, is seen in the falling off of 4,000 immigrants during July.

Western Labor authorities and others protested against immigrants coming in in such large numbers, and Mr. Stewart imposed certain restrictions which set the July total down to 12,288, as compared with 16,227 in July, 1925.

There has been a decrease in the number of Canadians returning from the United States to take up permanent domicile in the Dominion. During the first seven months of this year, 26,394 returned to their native land, as compared with 41,180 during the corresponding months of 1925.

Annual Consumption Of Meat And Dairy Products

Canadians Are Big Users Of Butter and Eggs

In a report just issued by the Canadian Government Bureau of Statistics the consumption of meats in Canada in 1925 is estimated at 228,709,000 pounds. The per capita consumption of all meats was estimated at 162.27 pounds for 1926 against 161.3 pounds for 1925, and for other important products for 1926, the per capita consumption was: butter 267,861,643 pounds or 28.54 pounds per capita; cheese 26,804,416 pounds or 2.92 pounds per capita; eggs 264,782,655 dozen or 28.3 dozen per capita; and poultry 90,212,585 pounds or 9.6 pounds per capita. The per capita consumption of butter and eggs is estimated to be higher in Canada than any other country in the world.

Would Be Worth Millions

Barn fires are sufficiently numerous to warrant exhaustive research work in an effort to find a reliable and effective preventive. Practically all that is known to date is that spontaneous combustion may occur, and when it does the chances of saving the barn are slim indeed. There must surely be some special condition or set of conditions that cause a barn, but what are they and how are they created? A real preventive would be worth millions to agriculture.

Farmer's Advocate.

Farmer's Advocate—Let the home farm be known for something special—good horses, fine cattle, pigs or sheep, choice fruit and grain. Live rings need not be maintained in order to be choice. Some farmers are noted for the extra fine bullocks marketed each year.

Palatial New Toronto Hotel

Toronto's new Canadian Pacific hotel which will be known as "The Royal Hotel." E. W. Beatty, chairman and president of the railway, finally decided on that name as being most fitting in that it associates the new hotel with the history of Toronto and conforms with the dignity and importance of the building and its splendid appointments. When completed it will be the largest and finest hotel building in the British Empire, containing over 1,000 rooms. Through a series of varying roof levels its central portion will rise to a height of 28 stories, the crown of which will be a roof garden with facilities for entertainment. The building will extend 350 feet along the north side of Front street opposite the new Union Station. It will be built on the site of the Old Queen's Hotel. It is likely the new hotel will be completed in about a year.

WORLD HAPPENINGS BRIEFLY TOLD

The honey harvest of Southern Alberta is expected to run to 300 tons, worth about \$100,000.

A remarkable and increasing demand for Canadian food products in Great Britain is reported by Major G. H. Johnson, Canadian trade missioner for Glasgow.

Canada's net debt decreased by \$62,789,157 during the first five months of the present fiscal year which opened on April 1, according to the monthly financial statement issued by the Department of Finance.

A total of 543 commercial vessels passed through the Panama Canal during the month of August, this being a new record. The previous record was 569 transits, made in July, 1927.

All the inhabitants of Turkey, including foreigners, are to be confined to their homes for an entire day on October 28, according to official regulations issued at Constantinople, fixing that date for the national census.

The beam wireless service to India has been opened to public traffic. The Government program of 1923 for linking up the British Empire by wireless is now complete, beam communication to Canada, Australia and South Africa being already in operation.

It is reported that Japanese divers at Sebastopol, Crimea, who were searching for a half-million sterling in gold (\$2,500,000) aboard the British cruiser Black Prince, have discovered the first gold coin. The coin bears the inscription of George III, and the date 1821.

It is expected that within six weeks it will be known whether or not oil in commercial quantities is to be added to Northern Ontario's inventory of wealth, for by that time tests which the provincial Government has been conducting in the Matagami Valley will be completed and a report upon them made.

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Planes Replacing Dogs

With aeroplanes coming into use all over Alaska for freight transportation, dogs are being used less and less on the trails. Consequently there is an over-supply and hundreds of huskies, abandoned, have reverted to the wild state and are becoming the most dangerous kind of marauders.

Air Base in Near East

British Planning One At Malta To
Protect Suez Canal

The British air ministry is said to be planning development of a great air base at Malta which will dominate the Eastern Mediterranean and will protect Egypt and the Suez Canal against attack.

This also is regarded as a precaution in view of Premier Mussolini's plan of developing a great military and naval base at Rhodes.

It is also feared that the Nizam of Hyderabad, who is one of the greatest semi-independent native princes, is planning to establish an air service in his dominion and is sending a number of young men of the leading families to be trained for air work in England. While of course, the service will be paid for out of the revenues of the Nizam, it will be coordinated with the Imperial service in India.

France Raises Tariff

On Canadian Wheat

Notice Of Increase Has Been Received At Ottawa

France has increased the tariff on Canadian wheat from 20 cents to 27 cents, approximately, per bushel, according to official advice received from the Canadian Trade Commissioner in Paris. The higher rate comes into effect immediately.

While Canada's export of wheat to France has fluctuated from year to year, the present change on the basis of last year's export of 4,155,867 bushels will mean an increase in the total French duty collected on Canadian wheat of nearly \$286,000.

Canada, under the 1922 treaty between the two countries, enjoys a minimum tariff and most favored nations' treatment on exports to France and the increase now put into effect is due to the raising of the minimum tariff rate to all countries by France.

A 'Chic One-Piece, Frock

Unusually smart is this modish one-piece frock of slenderizing lines. Contrasting material may be effectively used for the front panel, vestee, skirt, long collar, and facings on the dart-fitted or loose sleeves. An inverted plait at each side seam provides for the necessary fullness, and the narrow belt fastens with a buckle. No. 1614 is in sizes 36, 38, 40, 42, 44, and 46 inches bust. Size 38 requires 3 1/2 yards 39-inch, or 2 1/2 yards 54-inch material for the dress, and 1/2 yard 39-inch for collar, vestee, skirt panel and sleeve facings. Price 20 cent the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dress-maker. Price of the book 10 cents the copy.

If sometimes the tea you are using does not taste as good as it used to—just see what kind of a package it is in. No chances are taken with Red Rose. It is packed in clean, bright Aluminum.

Defies Alpine Climbers

Mount Robson is Still Victor Over Mountaineers

Mount Robson, giant peak of the Canadian Rockies, this year has turned back every party of Alpinists who have attempted to scale it. Two recent attempts were made by members of the Seattle Mountaineers' Club, but they too met with failure.

A drifting rain and low-lying clouds were encountered by the climbers on their dangerous ascent from the valley floor. At high altitude they ran into sleet and then, when the weather cleared, they waded waist-deep through snow. Finally, when success seemed almost certain, they brought up against a huge icefield blocking the only possible approach to the summit.

The cliff is 100 feet high and almost perpendicular. The climbers said they would try again next year.

Place For Garnet Wheat

New Variety is Giving a Good Account Of Itself This Year

"Garnet wheat is giving a good account of itself this year," said L. H. Newman, Dominion cerealist. "The first earload of wheat delivered on western railway lines this year was Garnet," he declared, "and I am pleased to hear that the demonstration plots at Raymond got Garnet wheat estimated to run 40 bushels to the acre, two weeks earlier than the average cutting." Mr. Newman made it plain that, although he had carried on the closing experiments which resulted in the production of Garnet, he was not making undue claims for it. He is still very strong for Marquis as the standard wheat, but believes there is an important place for the earlier-maturing Garnet.

Mothers Should Use

When The Babies Are Cutting Teeth

During the baby's teething time, in the hot summer months, the bowels become loose and diarrhoea, dysentery, colic, cramps and other bowel complaints manifest themselves; the gums become swollen, cankers form in the mouth, and in many cases the child wastes to a shadow, and very often the termination is fatal.

This is the time when the mother should use "Dr. Fowler's," and, perhaps, save the baby's life.

It has been on the market for the past 80 years, put up only by The T. Milburn Co., Limited, Toronto, Ont.

It isn't the cost of living that worries the man behind the bars.

ENGLISH LADY TENNIS TEAM

These are the smiling members of the famous English lady tennis team, which has been giving exhibition matches throughout Canada during the past few weeks, and which is soon to sail home after contesting the Wightman Cup. From left to right they are: Josh Fry, Betty Nuthall, Erynnyrd Harvey, Captain Hawkes, master of the Churned Liner Ascania, Mrs. D. A. Hill, and Gwendeth R. Storry. They are shown on the ship in which they sailed from England to Quebec.

SUNDAY SCHOOL LESSON

SEPTEMBER 25

THE EARLY KINGS OF ISRAEL

Golden Text: "Jehovah hath established his throne in the heavens; and his kingdom ruleth over all."—Psalm 104:19.

Devotional Reading: Psalm 105:1-8.

A Review By Means Of Allusions

In the fullness of spirit Nathan spake to David, and so in a hundred voices God through that rosy company of the prophet still speaks to us, and convinces us of our sin and of His presence.—Dean Stanley.

I dare not hope with David's harp to chase the evil spirits from the troubled breast.—Kobbe.

We think of prayer for others as a privilege, but he regarded it as a duty, not to pray for his people was to him a sin.

"Latest born of Jesse's race, Wonder lights thy beautiful face, While the prophetic effluence Scales thee for a path of toil."

"Because you cannot gain A wondrous Waterloo In life's great battle, why remain Unarm'd with foes in view?"

Be not afraid, Mike David, take your sling, And do some humble part in conquering—Julia H. Moly.

And his next son, for wealth and wisdom named, The clouded ark of God, till then in tents

Wandering, shall in a glorious temple enshrine.—Milton.

If I am only an instrument of gathering materials and another shall build the house, I trust my joy will be none the less.—William Carey.

His life is the tragedy of a man capable of nobility of character and of great service, who gave loose reins to his evil temper till his only ambition was to hunt and kill "a partridge on a mountain."

It seems an almost impossible state of self-deception which could let him flare out in indignant virtue against the supposed culprit, and never once dream that the case could apply to himself.—Hugh Black.

Rub It In For Lame Back.—A brisk rubbing with Dr. Thomas' Electric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

How Hospitals Care For Patients

Eight thousand hospitals in the United States and Canada take care of 12,000,000 patients a year or about 525,000 a day. It is estimated five billion dollars are invested in the hospital property and in the opinion of Dr. E. S. Gilmore, head of the American Hospital Association, it now is disgraceful or criminal to die under 75 years of age. Unfortunately many persons seem more or less reluctantly obliged to in spite of what hospitals can do for them.

Minard's Liniment relieves backache.

Air Patrol Covers Large Area

Approximately 165,000,000 acres of forest land in the provinces of Ontario, Manitoba, and Alberta were under a system of aerial protection during 1926.

Garret: "Do you think a travelling man can go to Heaven?"

"Mitchell: "Not if the Recording Angel audits their expense accounts!"

Treat Colds 2 Ways

With One Treatment RUBBED ON throat and chest, Vicks does two things at once:

(1) It is vaporized by the body heat and inhaled direct to the inflamed air passages, and

(2) It stimulates the skin like an old-fashioned poultice and "draws out" the soreness.

Naming Mountain Peaks

Mount Stanley Baldwin is Named

After British Premier

Tight Hon. Stanley Baldwin's name is to be perpetuated in Canada, by a mountain peak called after him.

The geography board has acted on a suggestion of the British Columbia Government and a peak in the Rockies in that province with an altitude of 10,500 feet is to be called Mount Stanley Baldwin. It is visible from the railway through the Yellow Head Pass.

Other peaks in the same Cariboo range are to be named the Premier Group after Sir Wilfrid Laurier, Sir John Thompson, Sir John Abbott and Sir Hon. Mackenzie Bowell. The Laurier Peak, 11,750 feet is the highest. Previously, mountains were named after Sir John A. Macdonald, Alexander Mackenzie, Sir Charles Tupper and Sir Robert Borden.

Just What He Wanted

A story is related of an old tenant farmer, who, on paying his rent, told his landlord that he wanted some timber to build a house, and would be much obliged if he would give him permission to cut down what would answer for the purpose.

"No," said the landlord, sharply.

"Well, then, sir," the farmer went on, "will you give me enough to build a barn?"

"No."

"To make a gate, then?"

"Yes."

"That's all I wanted," said the farmer, "and more than I expected."

"No."

"To make a gate, then?"

"Yes."

"That's all I wanted," said the farmer, "and more than I expected."

"No."

"To make a gate, then?"

"Yes."

"That's all I wanted," said the farmer, "and more than I expected."

"No."

"To make a gate, then?"

TAKE MEANS TO PUT AN END TO CUSTOMS FRAUDS

Ottawa. — "We have had some evidence brought before us to indicate that in certain quarters there would be a revival of illegal practices once our commission ceased to exist. For the benefit of such parties and others similarly disposed I think I can promise that other means will be devised and rigidly enforced for detecting such frauds, and that for the future when such frauds and illegal practices are discovered, they will be visited with swift and relentless punishment."

The above was one of the statements made by Chief Commissioner J. T. Brown, of the Royal Customs Commission, in a brief address at the close of the public sittings of the commission here.

"No doubt there have been some who have been guilty of defrauding the Crown of its just revenues and who have escaped the scrutiny of our investigators," he continued. "For such let me say that the mere fact that they have thus far escaped exposure and prosecution must not be taken as any assurance that such practices can be continued with impunity."

The chief commissioner's closing address, which was concurred in by his fellow commissioners, W. H. Wright and Ernest Roy, expressed sincere appreciation of the work done by counsel, auditors and others associated with the work of the commission during the many months of the inquiry. In response of the report which would be prepared and submitted to the Governor-in-Council, the investigation had been "worth while," said the chief commissioner.

"Two things above all appear to have been necessary under the circumstances," he said. "In the first place, an exposure of conditions as they actually existed both inside and outside the service, with an awakened and enlightened public conscience as to customs matters as a result. The work of the parliamentary committee and our commission has made the exposure fairly complete. In the second place, it is essential to have a head to the department with the ability, will and determination to bring about the necessary reforms. There is every indication that the present head of the department is such a man."

Projected Flight Cancelled

American-Globe Circling Tour To End At Tokio

Tokio. — The projected flight of the American-Globe from the Pacific to the Atlantic across the Pacific on its globe-circling tour was called off here by its co-pilots, Edward F. Schlee and William S. Brock.

The decision to call off the flight followed a lengthy conference with aviation experts here and others interested in the undertaking. Many cablegrams from America urging the fliers to stop at Tokio also carried weight. Brock and Schlee finally concluded the attempt to negotiate the Pacific would be futile.

They will take an early boat for the United States and have their monoplane shipped home.

Should Lead The Way

Geneva, Switzerland. — The United States, France, Germany, Japan, Holland and the other drug manufacturing or producing countries should lead the way in curtailing the output of narcotics in the opinion of Colonel Daniel W. MacCormack of Boston, technical adviser of the Persian government, as expressed on behalf of Persia before the League of Nations social welfare committee.

Farmer Killed By Airplane

Portsmouth, Ohio. — When a passenger airplane, just taking off from a new airport, struck his farm wagon here, Norman Hopkins, 26, farmer, was killed. Hopkins' two sons, Glen, 6, and Oscar, 9, who were riding in the wagon, were injured.

Next Meeting At Edmonton

Saint John, N. B. — Edmonton, Alta. was chosen for the next annual meeting of the Associated Workmen's Compensation Boards of Canada here. J. Sterling, of that city, was elected vice-president.

W. N. U. 1699

Fast Steamer 'Plane Service Is Planned

Would Cross From New York To France In Four Days

New York. — The New York Herald-Tribune says that plans are nearly completed to launch an all-American combination steamship-aeroplane service between Montreal Point, Long Island, Plymouth, England, and Havre, France, with fast ocean liners that will make the crossing in four days.

The proposed line is to be incorporated as the New York, London, Paris Steamship Company, and will operate a fleet of ten 20,000-ton liners. The ships, which will resemble United States naval destroyers but about twice their size, will be driven at an average speed of 31½ knots, but capable of attaining 35 knots. They will be about 500 feet long, with an 80-foot beam and a draft of 24 feet 5 inches.

The new liners, to be used exclusively for passengers, will carry 400 first class, who will be accommodated in small cabins, slightly larger than Pullman car drawing rooms.

Exodus Not Serious

Only Ten Per Cent Of University Graduates Go To States

Winnipeg. — The exodus of Canadian university graduates to the United States is not as serious as it is held to be in some quarters, according to Sir Robert A. Falconer, president of Toronto University, in an interview here.

"I went into the matter quite carefully at one time," Sir Robert said, "and I found that, according to figures I got from various universities in Canada, the emigration of graduates did not exceed 10 per cent. Sir Robert added that this exodus is not such a terrible thing as some people imagine; it supplies an outlet for our graduates." No one, he said, would bother to obtain a university education if they did not get the opportunity to use it.

Woman Drowned At Sea

Carried Over Side Of British Liner

Philadelphia. — Mrs. Cyril H. Mumford, 30, of Fair Acres Farm, near Hamilton, Ontario, was swept overboard from the deck of the British liner London Mariner, while the vessel was en route from England to this city.

The tragedy was revealed when the vessel docked here, bringing a tale of a stormy voyage and the husband and three children of the woman.

Mr. Mumford, a former British military officer, was returning with his family from a tour of England, Scotland and France when Mrs. Mumford, who had been on an upper deck of the vessel, was carried over the side by a wave.

Typhoon Devastates Japan

Four Hundred Dead and Many Injured

Tokio. — Four hundred persons are dead, 2,300 injured, and 700 houses destroyed in Kumamoto, island of Kyushu, in consequence of the typhoon and tidal wave, according to reports to the Japanese home office. In Fukuoka, Nagasaki, and Kanagawa prefectures there were few casualties, but numerous houses were inundated and damaged.

When the typhoon struck Tokio several thousand houses in the low-lying sections were flooded. Thirty children were injured when the roof of a schoolhouse was blown off.

Liable To Dumping Duty

New Ruling On Imported Apples Has Been Issued

Ottawa. — Imported apples have been declared liable to dumping duty. A ruling issued by the Department of National Revenue holds that apples are to be considered as a class of kind produced in Canada until otherwise ordered.

This means that a special (or dumping) duty in addition to the regular duty, will be applied to imported apples. The dumping duty will be the difference between the appraised value and the purchase price but not exceeding 10 per cent of the appraised value.

For Outpost Work

Miss B. R. Terry, R.N., Toronto, Ontario, nurse, left recently to begin work at the new medical outpost, All Saints' hospital, Alkavik, North West Territory, which has been opened under the auspices of the Mackenzie River Diocese of the Anglican church.

POSTAL DEFICIT MUCH SMALLER THAN EXPECTED

Ottawa. — Reduction of postage rates provided by the budget of 1936 has resulted in a deficit in the Post Office Department, but it is about a million dollars less than was originally estimated.

For the fiscal year which ended March 31 last, the returns are being made up and the deficit is placed at \$1,600,000. The estimated shortage was about \$2,500,000.

It would appear from these figures that the reduction in the letter postage from three to two cents per ounce has increased the volume of letters passing through the mails.

Simultaneously, a marked increase in the parcels post is recorded and a big business is being done. Despite the one third cut in the letter rate the result of the operation under the new conditions leads to the belief that in a year or two at least equilibrium will be established between postal revenues and expenditures.

More Settlers For Lethbridge

Lethbridge. — The Canadian Colonization Association has been so successful in the Lethbridge district that it has been decided to place another 25 families there this fall. One of the present settlers has placed 120 acres in sugar beets, 68 acres in potatoes and 400 acres in wheat and other small grains from which his returns this fall should be close to \$15,000. There are eight families now working for him.

Sittings Of Railway Commission

Ottawa. — The Board of Railway Commissioners announced the following dates for sittings in Western Canada: Saskatoon, Oct. 10; Edmonton, Oct. 12; Vancouver, Oct. 19; Victoria, Oct. 22; Nelson, Oct. 24; Lethbridge, Oct. 27; Calgary, Oct. 28; Regina, Oct. 31; Brandon, Nov. 1; Winnipeg, Nov. 9; Port William, Nov. 11.

Indian-Paleface Romance

This little lady is evidently attracted to the small Indian boy and perhaps even more to the gorgeous and unusual house he lives in — a typical story Indian Teepee. So she has mastered her shyness and is tempting him with a few candies. The little Chief is nothing loath to be tempted and meets her more than halfway. This pretty little incident occurred during the great Indian Day Celebrations at the Banff Springs Hotel recently and was duly registered by a C.P.R. photographer.

Good-Will Between Canada and U.S.

No Room For Distrust Says Hon. William Phillips

Ottawa. — There is no place for distrust or misgivings between Canada and the United States, declared Hon. William Phillips, U.S. minister to Canada, in the course of a stirring address to members of the Canadian Club, and delegates to the annual conference of the Association of Canada.

"It is an easy matter for us to understand one another," he said, "because our interests touch at some points and because already we are thoroughly well acquainted. We are in no sense foreigners to each other, yet we still have much to learn, one from the other. Already we have gone a long way on the road toward mutual co-operation but we still can go even further."

"Much of the sorrows and sufferings of the world would have been avoided in the past if nations had only found the courage to approach their international problems in an attitude of reasonableness and fair play."

"With diplomatic reasonableness — with diplomatic relations now established and with good-will manifest everywhere, Canada and the U.S. are ready, I hope, to discuss all questions of mutual concern, as they arise, cheerfully and frankly, and in a spirit of helpfulness. In so doing we shall become the happiest illustration of what we hope civilization has in store for the entire world. For between our two countries there is no place for distrust or misgivings."

Victim Of Experiment

Scientist Meets Death While Testing Effect Of Anaesthetic

Manchester, Eng. — A victim of his own scientific zeal, Dr. Disney Wilson, surgeon and anaesthetist with a British and American reputation, was found dead in his laboratory. His wife discovered the experimenter with a mark over his face before a machine which administered gas mixtures.

It had been Dr. Wilson's great ambition to obtain and prolong the anaesthetic state, which is obtained momentarily when a person under an anaesthetic loses feeling yet retains consciousness.

Dr. Wilson's brother said the doctor believed he had sufficient will power to prevent himself from losing consciousness completely. Colleagues are of the belief that he met death experimenting on himself to discover the actual effects of an anaesthetic, which it was his conviction was the only way to obtain essential data.

Insured For Millions

187 Persons In U.S. and Canada Carry Heavy Policies

The lives of 187 persons residing in Canada and the United States are worth \$1,000,000 or more each in insurance companies, according to a survey made public by the Spectator Company, of New York.

Rodman Wanamaker, merchant heads the list with \$7,500,000 in policies. Several persons, including Dr. F. G. Banting, of Toronto, discoverer of insulin, are insured for \$5,000,000 each.

REQUIRE MORE TRADE ROUTES FOR THE WEST

Vancouver. — "If Canada is to achieve the proper destiny by a great nation, the people of all sections of the country must realize that new trade routes must be established and hardy new settlers, no matter what their nationality, be brought in to develop the vast wealth stored in the great northern hinterland," Premier James G. Gardiner of Saskatchewan declared in an address before the Canadian Chamber of Commerce Convention here.

"All Canadians must get a vision of what the 20th century has in store for us, then put our shoulders to the wheel and push on to the destiny that is ours," said the Premier of Saskatchewan, 25 years ago a penniless homesteader from Ontario, thrilling his 200 auditors with his picture of the Canada to come.

"The most disconcerting question which can be introduced into discussions national or international, is the proposal to change trade routes," Premier Gardiner pointed out. "Some of the greatest wars in history have been fought on that issue. I would say to those interested in opening the Pacific route — and why should it not be opened? — to those interested in opening the Hudson's Bay route, do not expect that those now operating on the established trade routes are going to admit lightly that new routes will not operate to their disadvantage or to those interested so that their opening will redound to the national interest."

Railway development in Canada was a thing of the future, not of the past, despite the great lines already constructed, Mr. Gardiner declared.

Seven-eighths of all wheat entering into international trade was produced in Canada at the present time, he said. This meant, he explained, that the prairie provinces with a population of less than 2,000,000 were feeding 40,000,000 in other countries. Yet only one-third of the land capable of producing grain had been brought under cultivation so far.

When the great remaining open spaces were populated there would be more than enough business to keep every port in the country busy for every month it could remain open, he predicted, and Vancouver, free-free all year and sole outlet for a great producing region, would be one of the greatest commercial centres in the Dominion.

Proposals To Outlaw War

New Idea Presented To League By Norway Delegate

Geneva. — A "voluntary universal arbitration" pact was introduced at a session of the League of Nations assembly on commission on disarmament by Dr. F. Nansen, of Norway. The pact created tremendous interest as a concrete development of the movement to outlaw war.

The pact makes all war between signatories impossible by arranging settlement by an arbitration board of all conflicts which are not handled by the World Court or are not solved by the Council of the League of Nations.

Flee From Earthquake Area

Tourists Along Black Sea Coast Crowd All Transports

Moscow. — Thousands of panic-stricken tourists along the Black Sea coast were crowding all means of transportation in order to escape from the district which has been shaken by earthquakes in the past few days, causing death and injury in many districts. Late reports from Yalta say that 13 persons have been killed there and 358 injured. Slighter shocks were still continuing in the region. The advisers said, relief measures are under way.

Royal Brothers Arrive Home

Southampton, Eng. — The Prince of Wales, looking very bronzed and fit and in excellent spirits, stepped ashore from the Empress of Scotland here, ending his trip to Canada. He was accompanied by Princess Louise, The Duchess of Southampton and other city and county officials welcomed the two princes, who immediately boarded the train to London.

Joys of the Car Owner.

He owned a handsome touring car.
To ride in it was heaven.
He ran across some broken glass—
Bill \$14.97.

He took some friends out for a ride.
'Twas good to be alive.
The carbuhrator threw a fit—
Bill \$20.85.

He started on a little tour.
The finest sort of fun.
He stopped to quick and stripped
his gears—
Bill \$90.51.

He took his wife down town to
shop.

To save car fare was great;
He jammed into one lamp post—
Bill \$268.

He spent about all that he had,
And then in anguish cried:
'Till put a mortgage on the house
And take just one more ride.

Open Seasons for Game

Following are open seasons for
game—

Ducks and Geese—Sept 15 to Dec
15th.

Hungarian Partridge—Sept 15 o
Dec 14

Prairie Chicken and Partridge—
No open season.

Deer—Nov 1 to Dec 14

Otter, Nov. 1 to May 1.

Beaver, No Open Season.

Muskrat—Between North Snak.
River and Tp. 91, March and
April only.

Game Licenses can be had at Sun
Office, where copies of the
Game Act can be seen.

Hyett & Schmidt, Agents, Stony Plain.

Here and There

Four ships, arriving at Vancouver
with one week's freight, have
\$20,000,000 worth of silk from the
Orient, for transshipment to New
York. This is the heaviest move-
ment of its kind on record along this
coast.

The Canada Colonization Associa-
tion, a subsidiary of the Canadian
Pacific Railway for the settlement
of privately-owned lands in Wes-
tern Canada, in the first six
months of 1927 accounted for the
placement of 401 families on 97,944
acres of land.

The first passenger trip of the
Lethbridge Commercial Airways
was made on August 7th, between
High River and Lethbridge by a
plane piloted by Jack Palmer. It is
announced that commercial flights
will be arranged between Lethbridge
and Waterton Lakes.

Already the muskrat has come
to lead all other furbearers of the
Dominion in the total value of pel-
try sold, not alone by reason of
the great number of pelts taken,
but on account of the remarkable
rise in the price of the furs. In
the olden days furs sold in London
for a few cents apiece and in even
more recent times.

An official announcement has
been made to the effect that the
Canadian Pacific Railway Company
will construct a line from Midland
to Port McNicoll. Public parades
and demonstrations were held in
Midland when the announcement
was made as the citizens feel that
the new line will mean a great deal
in building up manufacturing and
industrial concerns there.

Irene Clatie, formerly well-known
dancer, and wife of the owner of
the Chicago Black Hawks hockey
team, has recently been staying at
the Canadian Pacific Railway hotel,
the Algonquin, with her little daugh-
ter. They attended the Charlotte
County Cottage Crafts exhibition
pageant which is held at St. An-
drews every year. Burtie dancer
and folk song featured at the
pageant.

Recent changes in the department
of Natural Resources of the Cana-
dian Pacific Railway have been ef-
fected. P. L. Naimish who has
been manager of that office since
1912 tendered his resignation,
whereupon Mr. S. G. Porter will of-
ficiate as manager. Mr. Naimish
will, however, retain his position
as chairman of the Advisory Com-
mittee, which he has held for the
past two years.

No Canadian agricultural honor
has come at a more propitious time
than the award of the silver medal
"for outstanding excellence" to the
Canadian exhibit of tobacco pre-
pared by the tobacco division of the
Central Experimental Farm at Ot-
tawa at the Tobacco Exhibition held
at Olympia, London, England, in
May. The Canadian product came
into competition with that of South
Africa, North and South Rhodesia,
India, Colombia, Italy, Greece and
Macedonia, thus consolidating the
position previously held by Canada
in expert opinion as the producer
of the best tobacco in the British
Empire.

PAINTED FIRES

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER VIII.—Continued

The Wymuths were exactly the same type,—black hair, black hair, through which a bloodless scalp showed blotchy; false teeth—no, not false—everyone could see what they were—artificial, rather—so while they were almost, but they believed in hell and spoke of the "world" in a tone which implied both horror and contempt. They knew that Christ was coming soon to take His own out of the world, leaving the other odd millions to their well-merited punishment.

Mr. Wymuth satisfied the Board that he believed in discipline for wayward girls—discipline, repentance, and after that a life of meek and lowly spirit.—"And," said Mr. Wymuth, "my wife will be guided by me entirely," at which Mrs. Wymuth heaved her head and drew her thin lips more tightly over her bus teeth.

"The Board breathed more freely. 'It will be better now,' said Dr. Smythe, 'and I think it would be well to have the pastors appeal to the ladies to have a series of teas to raise money for the additional salary. I am sure the ladies will take care of it.'"

It was to the Girls' Friendly Home (under the Wymuth rule) that Helmi finally was committed. If she had been of the full age of eighteen years she would have been sent to jail.

The police matron, a silent woman, who held her job because she was no talker, came with him on the car. Helmi, with her clothes in a little green valise which Miss Abbie had given her, walked confidently down the path which led to the big oak door. The former matron's flowers bloomed at each side of her. They nodded a welcome to her, and she felt reassured and comforted. It must be a nice home where there were so many flowers. Helmi had put on her pleated skirt and white middie, which now had the monogram on it, just like the other girls. She wore it just, be-

cause it had always brought her a good time and was full of the vibrations of fun and fellowship. The Blue and Gold Book was in her valise, and her English learning book, too. She would be all right, and Miss Rodgers would come, and the girls, too.

Helmi had not yet given up hope that Mrs. St. John would come to help her when she was better. She still thought of her as she had last seen her, healthy-eyed, distressed, ill, and old herself over and over again that this was why her dear friend had not come to her. She was still too sick to know what had happened. Helmi liked to picture the scene. Her friend in her pinky gown of black silk, with her pearls, would come; she would be wearing her green velvet cloak, the one that looked just like the ocean foam that had come cutting away from the boat in creamy seas when she crossed the ocean; and her black hat with the silver arrow; she would come driving up in her big car and talk to the people in big swanky English words, making her eyes go snap like she could when she wanted the Doctor to do something. Everyone always did what Mrs. St. John wanted, and she would be so mad that people had been mean to Helmi, and she would call them names, and stamp her foot, and maybe wear a little—just a few good ones. And then she would turn and say "Come, Helmi, my poor, brave child."

Oh! it would be sweet.

As Helmi was the first case to be brought in since Mr. and Mrs. Wymuth came, the worthy couple were determined to show the Board the value of discipline. The history of the case had been given them. The girl had refused to tell why she was in the Chinese den.—It was evidently a stubborn case. Mr. and Mrs. Wymuth had dealt with stubborn cases before. The proud and forward girl must be broken. And it could be. They were waiting eagerly for Helmi. The Board would expect results, and the Board would not be disappointed.

When the Police Matron and Helmi climbed the flight of stairs leading to the great front door and the bell rung the lock was turned in the door and they were admitted into a dark hall. As they entered the door was shut again so promptly behind them that the corner of the Matron's cape was caught and had to be released. Then the big bolt shot into place, and in a whisper Mrs. Wymuth asked them to come this way, leading them down the hall by a gloomy room which she called her "Retreat." The door was shut and locked, and Helmi was told to sit down.

The Matron, living up to her reputation of being no talker, handed Helmi over with as much emotion as is shown by the ice man when he loses his pincers from the square of ice and leaves it to drip its life out on your back step. His responsibility ceases when the step is reached.

"Good-bye, Helmi, be a good girl," she said, not without a degree of kindness. Her last delivery to the Girls' Friendly Home had pulled a handful of hair out of her not too well covered head; so she felt kindly to Helmi.

Helmi wrote her name in the brown book Mrs. Wymuth showed her, quite proud of the fine big letters she was able to make. She wrote her address "c/o Miss Abbie Moore, 52 Chestnut St."

Mrs. Wymuth admired her writing. "And you can English speak?" she asked sweetly, feeling that if she transposed the words they would be

more intelligible to the Finnish girl. "A little," said Helmi, smiling back. "You will learn more here," said Mrs. Wymuth: "all our good girls go to school. You like school?" Helmi nodded.

"Now, dear I want to be your friend. I am a little brother to all the girls—I want you to tell me all about yourself."

Helmi told her about coming to Saint Paul—her aunt's death—her coming to Winnipeg—Miss Abbie Moore—the Girls' Club—Suddenly she stopped.

"Ye-e-e-s!" Mrs. Wymuth stretched the word out until it seemed like a sharpened pry which would be sure to lift another slab of conversation.

"That's all," said Helmi.

"Who sent you for the medicine, dear?" asked Mrs. Wymuth casually. "I cannot tell," replied Helmi, looking her questioner straight in the eye.

"You mean you will not tell. Now, Helmi, trust me—I'm your little mother," she came over to the girl and laid her hand on her shoulder. Her touch made Helmi shiver, and when she bent nearer Helmi drew away from her.

"I will not tell," said Helmi again.

Mrs. Wymuth drew her lips tightly over her two plates. "We'll see," she said, and Helmi knew it was a threat.

That night Helmi met the girls at supper. The table had been turned diagonally across the room to get greater length, and it had a clean cloth, although it was not Sunday. Mrs. Wymuth had expected a visit from some members of the Board.

"Now, girls," said Mrs. Wymuth, in her sweet way, after a lengthy blessing had been called down from on high, "we have a new girl, Helmi Milander. She has come to us for a while, and I want you to be very good to her, and very kind. Let her know she is among friends here. Helmi and I have had a little difference already, which I wish to tell you about. In order to help her I must know her whole story, and this she refuses to tell me. I have coaxed her, but she remains stubborn. Isn't she foolish, girls? I am here to help every girl, but the girls must let me. Isn't she foolish, girls?" she repeated.

"Yes, Mrs. Wymuth," said the girls in chorus. But they said it listlessly. Their days of mourning for the other matron were not over yet.

Then Mrs. Wymuth proceeded to tell the story, the girls listening open-mouthed. A new girl's story was always interesting.

"Now we will all pray that Helmi's stubborn spirit may be melted. You will all pray, won't you, girls?" Helmi sat looking from one to the other helplessly. Had she not one friend anywhere?

Every night after the evening meal there followed this orgy of prayers, when every girl who wanted to stand with the matron prayed. Much of it was meaningless, but as the prayers went on a certain excitement laid hold on them, and in their applications they forgot that other ears than the Good were listening, and unconsciously they revealed many things. The Matron, was hopeful that Helmi would be swept into the whirlpool of excitement, and would tell what she wanted to know. Helmi sat still and listened, but refused to pray.

(To Be Continued)

Words sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Exterminator to drive out the parasites.

Testing Big Sealplane
The Westminster Gazette announces that the British ministry is trying out a 3,000 mile special sealplane development flight in the Baltic with a fleet of experimental flying boats as exhaustive tests for naval and commercial transport work. It is hoped, the Gazette adds, that the tests will involve huge all metal aerial battleships to act as the eyes of the fleet.

Reno Rancher Ordered Sixty Plates Meal From San Francisco

The St. Francis Hotel at San Francisco received an order for a sixty-plate dinner to be delivered by aeroplane at the home of W. H. Moffit, cattle rancher, near Reno, Nev.

Arrangements were made by telephone from the Moffit ranch to forward the meal in an express aeroplane, with electric heaters to keep the food hot, a head waiter to superintend the serving, and two aviators properly attired to serve.

New Home Ready

Prince Of Wales To Take Up Residence Marlborough House

The Prince of Wales will go into residence at Marlborough House soon after his return from Canada.

Marlborough House, an almost square, solid red brick building, was built by Sir Christopher Wren just over 300 years ago for the first Duke of Marlborough. Later it became the residence successively of various members of the royal family, and finally was acquired for King Edward VII. then Prince of Wales.

A DOCTOR'S PRAISE

A Noted Doctor Strongly Endorses Dr. Williams' Pink Pills

The test of any remedy lies in its acceptance and employment by the qualified medical practitioner. No less an authority than Dr. Andrea Aude, physician to the Papal hospital, writing on the subject of anaemia, impoverishment of the nervous system and disorders attributable thereto, strongly endorses Dr. Williams' Pink Pills, recommending them as superior to other tonics.

Dr. Aude's testimony reads as follows: "For several years I have made use of Dr. Williams' Pink Pills in my work and I have always found them efficacious in the treatment of disorders due to impoverishment of the nervous system, anaemia and neurasthenia, stomach weakness, retarded development in young women, and irregularities. There is no lack of tonic remedies, but in my experience no one of them manifests a superior efficacy to that of Dr. Williams' Pink Pills."

No more conclusive evidence of the value of Dr. Williams' Pink Pills could be asked for or given, than is found in the above endorsement of this noted European physician. Besides this, however, this medicine has enjoyed a world-wide public confidence for more than a third of a century and has brought relief to thousands and thousands of weak and suffering people.

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuralgia, nervousness and stomach trouble. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Hard and soft corners both yield to Holloway's Corn Remover, which is controlled and tested in certain satisfactory in its action.

Was interested in Photography
Queen Alexandra's interesting collection of photographs taken by herself has just been bound. Her late Majesty had a great gift of setting a good picture, and would have made a name in this line were she born in a less exalted position. In the collection are pictures of every royalty in Europe, for more than half a century. Up to a few years before her death she kept up her interest in the camera.

Though unresponsive, as a rule, to natural beauty, Napoleon showed a marked preference for violets.

Little Helps For This Week

"Let the word of Christ dwell in you richly in all wisdom.—Col. III. 16.

"It is not the skill of human art Which gives me power my God to adore."

The sacred lessons of the heart Come not from instruments below; Love is my teacher.

—Madame Guyon.

Every great teacher or leader lays stress on some single word of night—the key, as it were, to his position. Buddha's great word was "renunciation." Zoroaster's, "purity." Men's was "justice." The key to Confucius is "moderation." Moses emphasized "law." Plato, "harmony." Socrates, "reason." The strong word of Epictetus was "reliance." Antoninus, "self-possession." But Jesus gave us the key to the inner chamber of His heart in a single, mighty, sweet word—"love."—O. B. Frothingham.

Merely a Signature

A member of a congregation, hearing Sunday's sermon, the minister was preaching, wrote the single word, "Fool" on a sheet of paper, called an usher to him, and had it delivered to the minister in the middle of his sermon. The minister, opening the paper and read what was written. The said: "An unusual thing has happened. A member of the congregation has signed his name without writing the letter."

Girls admire grooming young men, but everybody else prefers those who pay cash.

Used by physicians—Minard's Liniment.

COLDS COST MONEY

FORTIFY YOURSELF AGAINST THEM

It is estimated that a sufferer from colds loses three days' time from work in a year.

At work, in the "office" or at any entertainment, if your neighbor has a cold and sneezes or coughs, the air is full of germs and if you are not in good condition, you may become ill. The only protection you can have is to build resistance against disease forces. Take that splendid herbal tonic,

DR. PIERCE'S GOLDEN MEDICAL DISCOVERY

It increases the appetite, stimulates the digestion, helps to enrich the blood, and to improve the health generally.

Procure it from your druggist, in either liquid or tablet form. Write Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., if you desire free medical advice.

EXPECTANT MOTHERS

Read Mrs. Menard's Letter. Her Experience May Help

Chatham, Ontario.—"I want to tell you how much good your medicine has done me. Before I had your medicine I felt so weak and run down that I could hardly do my work. My head ached constantly and I was so discouraged that I could not get up in the morning. I had another baby just one year ago and a half old and it gave me a lot to do. So I thought I would try Lydia E. Pinkham's Vegetable Compound, as I had read so much about it in the 'Little Books.' I found a difference right away as my head was relieved and my tired feelings gone. My sister had been doing my washing and she continued doing it, as she thought it might set me back if I started to do it again. It sure did help me and I had taken just two bottles when my baby came. He is a fine big boy, now nearly five months old. I am taking your medicine again and I am able to do my work all by myself now. I always recommend the Vegetable Compound to women, and especially to expectant mothers, as I believe it really helps those who are weak. Mrs. OLIVER MENARD, 24 Harvey St., Chatham, Ontario."

For Economical Transportation

CHEVROLET

3 years from today
You Will Know

YOU would require three years of arduous day-to-day driving to know as much about Chevrolet performance and endurance as the General Motors Proving Grounds brings out in a few months.

There's strength—stability—ruggedness built into every inch of the Chevrolet Chassis; into its beautiful body by Fisher; into every detail of its powerful engine.

After years of trouble-free driving, you will know that Chevrolet has added to its economy, its smoothness, its power and its Beauty, the greatest measure of Strength and Endurance ever possessed by any low-priced car.

Ask your Chevrolet dealer for a demonstration.

SUMMERFIELD & MAYER.

Pioneer Passes Away.

One of the old-time residents of Stony Plain district passed away Tuesday morning at 6 o'clock in the presence of Mr Jacob Fuhr.

Deceased was in his 65th year, and had come to this country in 1892. He settled, in the first instance, at the southeast corner of the Baseline and the Meridian, but later moved to the half-section two miles south of Spruce Grove, where he has since farmed.

He leaves to mourn his loss his wife; three daughters, Mrs John B Miller of Stony Plain, Mrs Hyle of Edmonton, Miss Ida Fuhr, at home; and six sons: William, Louis, Philip, Jacob, Conrad and Adolph.

Holborn Happenings.

The people of Holborn will no doubt be glad to learn that the silver medal for the Jubilee contest in the Oneway Inspectorate was won by Frances Maier, aged 12, a pupil of Holborn school.

Silver medals were awarded on the basis of one each for the highest marks in Public school grades in each of the 25 Inspectorates in the province.

Editor Will Take a Chance

Of course scientists tell us there is great danger of contracting disease from handling paper money, but we'll take a chance on any of the long green paid on subscription to this weekly home necessity.—Chinook Advance.

Calamities Overtakes This Family.

Did you ever hear of the man who was too economical to take his home paper, but sent his little boy to borrow the copy taken by his neighbour? In his haste the boy ran over a four dollar stand of bees and in ten minutes looked like a warty summer Squash. His cries reached his father, who ran to his assistance and failing to notice a barbed wire fence, ran into that, breaking it down cutting a handful of fish bait out of his anatomy and ruining a four dollar pair of pants. The old cow took advantage of the gap in the fence and got into the grain and killed herself eating green feed.

Hearing the racket the wife ran out, upset a four gallon churn full of rich cream into a basket of kittens, drowning the whole bunch. In the hurry she dropped a seven dollar set of false teeth, the baby left alone crawling through the spilled cream and into the parlor ruining a twenty-dollar carpet. During the excitement the eldest daughter ran away with the hired man, the dog broke up eleven setting hens, and the calves got out and chewed the tails off of four fine shires.

Now dear reader, the above story preaches its own moral. Supposing the wife had brought the cream to Stony Plain she would have got more than enough to have bought her own paper.

Further comment is unnecessary. Our subscription is only Two Dollars per year. Isn't it worth it?

Spruce Grove News.

Stacking operations are in progress on quite a large number of the local farms.

Owing to the inclement weather on Wednesday of last week, the big dance was postponed for seven days.

An enterprising merchant from the City has leased the premises occupied by Mr Einer Anderson on Railroad avenue, and has started a grocery and provision store, with the opening on Saturday evening last.

Mr M McKeen and family have moved from their apartments in the Schwindt block to the house formerly occupied by Mr Maier.

Signell of Edmonton shipped a car of cattle from the Grove last week.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Mecklenburg, eye specialist, will be in Stony Plain Thursday, Oct. 6th.
